

## Thank You...

... to Governor Peter Shumlin, who challenged Vermonters to rebuild stronger and for implementing an array of state policy and program changes that will help our communities and businesses bounce back from the next disaster.

... to the project sponsors Matthew Suchodolski and Debra Beavin of US Department of Commerce, Economic Development Administration who administered the grant and provided fantastic support throughout the project.

...to our many project team partners at the Agencies of Transportation and Natural Resources, and the Regional Planning Commissions for coming together to see the value of working together to reduce flood risk, protect the natural environment, and ensure our communities remain open for business. Special shout out to Mike Kline at the Agency of Natural Resources and Peter Gregory and Pete Fellows at Two Rivers-Ottawaquechee Regional Commission for your partnership in this effort.

...to the consulting team of DuBois & King, Inc., Fitzgerald Environmental Associates, LLC, Landslide Natural Resource Planning, Inc. and Milone & MacBroom, Inc., led by Mary Nealon of Bear Creek Environmental, LLC. Your knowledge and professionalism attending meetings, conducting field work, gathering and analyzing data and developing recommendations helped five communities and the State of Vermont become stronger and more resilient to the impacts of future floods.

...to the leadership and engagement of local Selectboards, Planning Commissions, town staff, and the participation of hundreds of citizens and businesses from the VERI communities who took time to attend meetings and shape the recommendations. Your enthusiasm and determination to make your community better and safer gives me confidence Vermont's communities and businesses will be better prepared for the next disaster.

... to our sister agencies and non-profit partners for their on-going commitment to implement the VERI recommendations.

A final thanks to my team at the Department of Housing and Community Development for their service and dedication to Vermont – you're amazing me every day! I am assured when we look back ten years from today, we will be proud to see how VERI built stronger communities.

Noelle MacKay, Commissioner  
Department of Housing and Community Development  
September 2015

## Acknowledgements

The Vermont Economic Resiliency Initiative (VERI) was supported in part by a grant from the US Department of Commerce, Economic Development Administration (US EDA). Thanks to US EDA's Matthew Suchodolski and Debra Beavin for their support and guidance.

Work on VERI benefited from the help of a number of organizations and individuals who shared their time and knowledge and actively participated to improve and shape this project and report.

Thanks also to the Agency of Agriculture, Food and Markets, the Vermont Department of Labor, the Vermont Division of Emergency Management and Homeland Security, the Office of the State Auditor and Economic & Policy Resources, Inc. for their assistance with data gathering and analysis.

Thanks to the consulting firms for their work developing the five community reports and recommendations. Their professionalism, quality work and dedication not only provided a strong work plan for the municipalities, but will serve as a model for other states and communities. Special thanks to Mary Nealon of Bear Creek Environmental, LLC for her leadership in bringing together the talents of the following firms and individuals:

- ➔ DuBois & King, Inc.: Matt Murawski
- ➔ Fitzgerald Environmental Associates, LLC: Evan Fitzgerald
- ➔ Landslide Natural Resource Planning, Inc.: Amy Sheldon
- ➔ Milone & MacBroom, Inc.: Roy Schiff

Finally, thanks to the leadership, participation and engagement of the Selectboard, Planning Commission, municipal staff, Chambers of Commerce, businesses and citizens of the following towns:

- ➔ Town of Barre and Barre City
- ➔ Town of Brattleboro
- ➔ Town of Brandon
- ➔ Town of Enosburgh and the Village of Enosburg Falls
- ➔ Town of Woodstock
