Narratives**Disaster Damage:**

The State of Vermont has published an Action Plan for Disaster Recovery that describes the proposed use of \$21,660,211 of U.S. Department of Housing and Urban Development (HUD) Community Development Block Grant Disaster Recovery (CDBG-DR) funding associated with the Appropriations Act, 2012 (Public Law 112-55, approved November 18, 2011). The Act provides for disaster relief for unmet needs, long term recovery and restoration of housing, economic revitalization, and infrastructure resulting from severe damaging storms that occurred in the State between April 23 and September 2, 2011; specifically, for FEMA Disaster Declaration 1995 (April 23-May 9, 2011 flood), FEMA Disaster Declaration 4001 (May 26-27, 2011 flood), and FEMA Disaster Declaration 4022 (August 27- September 2, 2011 Tropical Storm Irene) that the President declared major disasters under Title IV of the Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.). The HUD guidance for the funding was published April 16, 2012 with an effective date of April 23, 2012 in the Federal Register as Docket Number FR-5628-N-01.

Tropical Storm Irene was an exceptional event in the history of our small state. Nothing since the Great Flood of 1927 has so devastated Vermont. The state sustained extraordinary damage on August 28th, when record rainfall resulted in catastrophic flooding. Some areas received ten inches of rain and were battered by winds of 50 miles per hour during an eight hour period. Rivers across the state crested at levels not seen for generations, some exceeding historic records established during the flood of 1927.

The damage was severe and widespread. Six Vermonters lost their lives. Fifty thousand households lost power, affecting 74,000 people. Over 3,500 homes were damaged or destroyed, displacing 1,500 families; more than 500 of the impacted homes were mobile homes. Transportation and public infrastructure were decimated. Of Vermont's 251 towns and cities, 225 suffered damage to municipal infrastructure. In the immediate aftermath, over 500 miles of state roads were damaged, more than 200 miles of state-owned rail made impassable, over 200 bridges damaged, and 34 state bridges closed. Thirteen communities were completely cut off for days, as National Guard units were mobilized to deliver emergency supplies to these towns by air. More than 300 businesses sustained losses or were destroyed. Agricultural impacts include the flooding of 20,000 acres of farmland, and the loss of over 400 acres of crops as well as many herds of livestock for Vermont's family farms. The largest state office complex was completely flooded, forcing the evacuation of state employees and clients of the Vermont State Hospital (an acute mental health facility), displacing 1,500 state workers indefinitely. Even the State Emergency Operations Center (SEOC) was flooded, necessitating its relocation to the FEMA Joint Field Office. Sixteen public schools could not open for weeks.

Vermonters mustered every possible resource to respond. National Guard troops from seven different states were deployed as the storm unfolded. Communities instituted their emergency management plans and heroically rose to the challenges facing them. As the floods receded, Vermonters volunteered their time and resources cleaning homes and businesses and feeding, clothing, and housing fellow Vermonters who had lost everything. Vermonters continue to volunteer to rebuild homes, clear debris, collect donations, and raise disaster relief funds. State government has redeployed staff to continue to support the ongoing needs of the disaster response. However, the resources of this small rural state cannot cover the extraordinary extent of the damages from this devastating event.

The localized impact of this disaster has placed many Vermont communities under severe fiscal stress. The cost of damage in many rural towns is several times their total annual operating budget. To pay for repairs and replacement, nearly 50 small Vermont communities have had to obtain loans and lines credit, some for more than \$1,000,000 which is a significant amount considering these are small rural towns, in some cases with only a few hundred residents. These towns will be paying off Irene related debt for many years to come.

Tropical Storm Irene established a record in terms of individuals requiring assistance. As of this writing, one out of every 85 residents (7252), registered for assistance and 226 maximum grants have been awarded under the Individual Assistance Program, totaling \$22,837,089 payments made to date.

The task force helped locate available rental housing, identify gaps in assistance, assess the need for temporary housing units, coordinate the response of housing agencies and advise FEMA's Housing Team.
The task force helped locate available rental housing, identify gaps in assistance, assess the need for temporary housing units, coordinate the response of housing agencies and advise FEMA's Housing Team.

Recovery Needs:

Housing Needs - Efforts are now focused on families and individuals that have not found permanent housing or repaired or replaced their existing housing. The vast majority of homes damaged or destroyed by the spring flooding and Irene was single family homes, including mobile homes. CDBG-DR funds will be used, through the Housing Recovery Program, for the repairs and rehabilitation as well as downpayment assistance for survivors whose homes were destroyed. The program is designed to complement assistance that is available from other sources such as FEMA, SBA and the Vermont Disaster Relief Fund. To address the remaining needs of those who lost mobile homes, CDBG-DR will help launch a mobile home financing program to facilitate the purchase of new homes. This, too, will supplement assistance already provided or currently available. According to FEMA, less than 100 units of rental housing were damaged. Nonetheless, the Housing Recovery Program will also include assistance for the owners of multi-family properties. In addition to being the sole source of revenue for some owners, these units provide critical housing options in communities such as Waterbury, which was experiencing a shortage of affordable housing prior to Irene.

Replacement housing is needed in the most heavily impacted areas. Funding is available on a competitive basis for the development of new housing in communities that lost units that were affordable to low and moderate income households. In addition, planning funds are available to assist in the redesign and site selection for relocating affordable housing in flood-prone areas, such as Brattleboro Housing Authority's Melrose Terrace and Hayes Court properties.

The Long Term Recovery Committees and disaster case manager have followed up with every household that registered with FEMA to determine any remaining unmet needs. CDBG-DR funds will be directed to the unmet needs of those households. The LTRCs are currently working with approximately 800 households with needs ranging from a few final repairs to needing complete new homes. This support is being made available by the state and voluntary agencies in coordination with the Homeownership Centers to ensure the transitional and permanent housing needs of survivors are met and they do not become homeless, particularly those with children. The state is not aware of any transitional housing or emergency shelter facilities impacted by the disasters and shelters report that disaster survivors are not turning to them. Unfortunately, some survivors continue to live in substandard housing situations. Those that are willing to accept help are being served by disaster case managers. Difficult cases are elevated to the state's Irene Recovery Office and resolved by an interagency team. In response to the flooding and closure of the Vermont State Hospital, the state is developing a new mental health hospital and three new regional acute-care mental health facilities. In addition, it has created a new housing subsidy and services support program. These will help meet the needs of survivors with special needs that are or are at-risk of becoming homeless.

Affordable Housing - Very little affordable housing, as defined as modestly priced, was impacted by flooding - in large part due to the state's adherence to restrictions on funding projects in flood-prone areas. A major exception was Melrose Terrace in Brattleboro, the 80-unit public housing complex which suffered significant flooding. The units have been repaired and reoccupied but housing authority needs assistance for planning and implementation to relocate the property out of the flood hazard area.

It is important to note that much of the housing destroyed or damaged by flooding was owned by lower income households and was affordable to them by virtue of modest cost to purchase or rent, without government assistance. This is especially the case for mobile homes where a University of Vermont survey showed that 85% of all residents in mobile home parks were low income and 40% were very low income or extremely low income.

Funding for affordable replacement housing is a component of the proposed distribution of funds. The project sponsors will determine the affordability level within the requirements of this grant and other funding sources.

Market Rate Housing Needs (non-subsidized) - The market rate homes without government financial subsidies make up almost all of the housing impacted by 2011 flooding. It is clear from the buyout amounts that the overwhelming number of homes that were damaged by flooding were quite modest, both mobile homes and conventional buildings. The occupants are of similarly modest means even though they were not in subsidized housing. Their needs for assistance to return to safe and affordable housing are substantial and cannot be met by their own resources or insurance.

Mobile Homes - Mobile homes in parks and on private land are an important source of affordable housing in Vermont and were disproportionately impacted by Tropical Storm Irene. While mobile homes comprise seven percent of the states housing units, they equaled 14% of the homes damaged by flooding. Case workers for those displaced from mobile homes estimate that 100 of the households in destroyed mobile homes have been unable to replace them. Sixteen mobile home parks were flooded in the 2011 floods. At least 12 parks lie partially in flood hazard areas and some will not be rebuilt resulting in a loss of affordable units. Purchasers of replacement mobile homes will require park lots or land to site the new homes. If the inventory of lots is reduced, new lots will be needed in flood proof locations. This requires new infrastructure of roads and utilities, as well as site prep for the home site.

Many of the damaged homes lie in locations that are in areas prone to repeated flooding and face further risk if they are rebuilt in the same location. Federal funds are available through the Hazard Mitigation Grant Program (HMGP) to purchase those properties. The federal funds pay 75% of the cost of purchasing the property, removing any buildings and site restoration. The local community is expected to pay 25%. The small communities of Vermont faced with major rebuilding costs for roads, culverts and government buildings are unable to meet the required 25% match. The state has committed to providing the 25% match through the CDBG-DR funds and andtoacomtetrogh the Vermont Housing and Conservation Board of \$2M of conservation funds to be used towards the 25% match.

The Hazard Mitigation Grant Program has worked with flood plain property owners who voluntarily wish to have their property bought out. To date, 137 residences have been approved at the state level and sent to FEMA for final review. Most are expected to be eligible and require funding. The HMGP funds can only be used for very basic site stabilization after the building is removed. Local communities, who become the owners of the remaining land, may wish to make additional site improvements to restore the land for public use and recreational activities only. These infrastructure costs will require additional CDBG-DR funds that cover 100% of the costs to help in restoring the municipalities and surrounding properties.

Additional purchases are possible and desirable. The State may be eligible for additional funding and a third round of purchases will take place late in 2012. The average CDBG cost for the above buyouts is \$47,350 and additional purchases are budgeted at that amount per buyout. This is believed to be 25 more purchases adding to the unmet need by \$1,183,750. In addition, CDBG-DR funds would be proposed to buy out properties deemed ineligible for FEMA grants, but that which is prudent to remove from the floodplain is estimated at \$1,147,786. Some of the cleared sites have been identified for recreational purposes and require development and design for appropriate public access that is estimated at \$1,334,943. This brings the unmet need related to buyouts to a total of \$9,440,248.

The total estimated unmet housing need is \$19,628,998. Source: Disaster Case Managers and Homeownership Centers.

Economic Revitalization - There are several aspects of losses to the economy from the floods. Buildings and their contents alone are estimated to have had losses in excess of \$100,000,000. Those businesses were unable to operate for periods of time that ranged from days to months. Many more businesses were shut down in communities that were cut off when roads and bridges washed out, employees, customers, shipments and deliveries were not able to get to the business, and power was out. Tourists were unable or unwilling to make trips to both affected and unaffected areas. These total losses may never be fully tallied, but are a multiple of the pure property damages. Many of the impacted areas depend extensively on tourism for income. The physical appearance of the community, especially the village or town center, is an important attraction for visitors. There are two unmet needs in this realm. The first is to restore the downtowns to a stronger, more resilient condition than before the flood. This may involve improvement of specific buildings, streetscape improvements, signage, or improved public facilities.

The second is to spread the word to travelers that the flood is long over, transportation and travel are not difficult, facilities for visitors have all reopened and, that the scenery is as beautiful as ever. Unfortunately, flooding and road damage make dramatic footage for news crews. Recovery is measured and does not present striking images (back to normal is not news). Our businesses need help tsredheordthatVemots oenforbusiness and we welcome back visitors. The Department of Economic, Housing and Community Development (DEHCD) surveys found that responding businesses had average financial needs of \$163,412. The largest categories of need were for debt reduction and working capital due to flood-related expenses. Business owners in that survey also had large unmet needs to repair their buildings and site and replace equipment. This survey did not capture all the unmet needs of businesses, but provides insight into greatest needs of those impacted. The total monetary need recorded from the 178 respondents was \$17,464,000. As the CDBG-DR funding becomes available and the Regional Development Corporations (RDC's) and other entities begin working directly with businesses to a make detailed assessments of their respective unmet needs, that dollar amount will surely grow to an excess of \$20M. Therefore, the CDBG-DR funds will have to be prioritized and managed appropriately.

Agricultural Unmet Needs

Vermont farmers face hardships similar to other business owners. Statewide agricultural losses due to Irene are estimated at \$10,000,000. The potential feed damage mostly to an estimated 120,580 tons of corn silage is still unknown due to fermentation and potential molds within the harvested feed, which will have to be tested. If all the feed were to be condemned due to poor fermentation and high levels of mold, the cost to replace the feed could be over \$8,000,000. These losses include immediate losses to ruined crops, damaged feed, dead livestock, flooded buildings, damaged equipment, eroded or sedimented farmland and continuing losses that include lost income when milk or crops could not be shipped, damage to stream banks, lost acreage due to stream bed relocation, costs of stabilizing stream banks, replanting pastures, replacing fencing, and restoring flood damaged farm roads, barnyards and other facilities.

Statewide, USDA compiled Irene related damage assessments on over 460 farms. Livestock farms lost feed for animals, which can affect income over time, while vegetable and fruit farmers lost direct income from the loss of product inundated with floodwaters. Statewide, flooding damaged over 400 acres of land producing fruit and vegetables. The estimated economic loss related to fruit and vegetable farming from Irene is about \$2.24 million. This income loss decreases the reserves that fruit and vegetable farms use for spring-planting needs. Considering the \$2.24 million will not be recovered, some farms that were adversely affected could experience viability issues during 2012.

The losses in the agricultural industry are sometimes less obvious, but no less devastating than those to buildings or roads. Animals can survive floods but be sickened leaving owners with substantial medical bills and, in the case of dairy cows, no saleable milk during treatment. And still the animal might die, resulting in more costs than if it had died in the initial flooding. Cropland is not just flooded and then uncovered when the waters recede. The crop is left covered with silt that may not wash off in subsequent rains rendering it worthless. Sediment deposition is often not good growing material and needs to be removed and then the field leveled, tilled and replanted before returning to productive use. Desabiizebankmaycontinue to erode for years to come, compounding the losses, if they are not modified,

even at considerable cost. Farmers are still discovering losses and repairs they had hoped to make themselves without assistance are now proving unaffordable, beyond their capacity, or too time consuming after their normal workload. The reduced fertility of fields will be fully understood after repairs are made and crops grown.

An April 2012 survey by the Vermont Agency of Agriculture, Food and Markets of farmers impacted by flooding revealed that 73% had not fully recovered from flood damage and most had remaining needs in excess of an average \$25,000 per farm. These farmers may still be eligible for USDA assistance, but other sources, including insurance have been exhausted. Assuming that each gets the typical USDA loan amount of \$10,000, there are substantial unmet needs for farms to rebuild buildings and return fields to production.

Based on the survey data and the USDA count of impacted farmers, the agricultural unmet needs are in excess of \$5,426,400. It is important to remember that farms are diverse and this includes both small producers and those with up to 3,000 acres and large dairy herds. Some large farms may have recovery costs remaining in excess of \$1,000,000. Source: USDA

Tourism

While Irene's devastation alone was a major economic blow to an already fragile state economy, the storm's timing created additional problems. The storm arrived on August 28th, just a couple of short weeks before Vermont's fall foliage season, one of the state's biggest revenue-generating travel seasons. Just as leaves were starting to turn, major roadways were impassible and many popular destinations were unreachable. Many in the tourism industry who were open for business and largely unaffected by the storm began reporting significant cancellations. Fewer visitors would quickly lead to empty restaurant tables and a lack of retail consumers.

The Vermont Agency of Transportation made critical tourism routes a priority, while the State's Department of Tourism and Marketing quickly launched an aggressive multi-media campaign designed to inform the traveling public of where and how to travel throughout Vermont.

However, many of the small towns with tourism-dependent economies suffered significantly whose non-state roads and bridges remained unusable and though the businesses were not impacted directly from the storms were impacted from lack of customers unable to get to their businesses.

Annually, the Tourism industry realizes over 14 million visitors who spend over \$1.4 billion, of which generates over \$200 million in direct State revenues. Hence, the critical need to combat any negative perceptions about Vermont's recovery.

The unmet need for the Tourism industry and marketing campaign is in excess of \$500,000 based on the need to bring visitors to the flood-impacted communities that rely heavily on tourism, and the projected advertising campaign costs.

The combined total estimated unmet economic need for small businesses, agriculture, and tourism is \$28,144,033.

Community Infrastructure Response and Unmet Needs

Tropical Storm Irene's impact to towns was extraordinary. Irene hit some 25 Vermont municipalities with 5 incurring everedamae. In many cases, communities downtown or village center nestled close to a river or stream, consistent with our state's traditional settlement patterns was ravaged by raging floodwaters. Some communities lost vital land records as municipal offices were located in hard hit areas. According to the Preservation Trust of Vermont, more than 600 historic buildings were impacted in over 30 downtowns or villages.

In addition to the transportation damage, many towns had to contend with extensive damage to other public infrastructure. Public water supply and wastewater systems, libraries, police and fire stations and town garages have all experienced significant damage. Town officials, state legislators and other local leaders have done an exceptional job under extraordinary circumstances, but the list of challenges facing impacted towns remains long and complex. The State made a decision early in the Irene recovery that it would aid towns with a range of support, including financial and technical assistance, and to act as an advocate for towns with federal agencies. The partnership between the State, towns, the Vermont League of Cities and Towns (VLCT) and Vermont's Regional Planning Commissions (RPCs) has been a hallmark of the recovery. This partnership and the ongoing state support of local recovery are critical for Vermont's overall success and must continue.

Public Assistance Support and Town Finances

While the final cost of recovery is not yet known, the magnitude of Irene's impact is expected to stretch many town budgets, some by multiples of their annual totals. Funding from FEMA's Public Assistance (PA) program will help cover most repairs, but towns will face the ongoing challenge of paying for the damages for years to come.

The state took additional steps to help local finances by agreeing to abatement assistance for the statewide education property tax, as well as a package of measures that accelerated highway aid and education payments and allowed disaster-impacted towns to defer education payments.

FEMA PA provides 90 percent reimbursement leaving the remaining 10 percent for the state and towns to split for damaged public infrastructure such as roads, bridges, culverts, public buildings and water treatment facilities. Towns have been forced to cover the cost of repairs out-of-pocket until the reimbursement arrives, which can take months. This has left town officials scrambling to find alternative financing to cover expenses. The state advanced payments of key state and federal programs, and initiated the Community Disaster Loan program with FEMA. The Municipal Bond Bank started a program to assist towns with low-interest loans to finance response and recovery efforts. Vermont banks were also quick to respond, offering favorable terms and fast turnaround, and have been good partners throughout the recovery.

The state and FEMA will cover 95% of the cost of approved repairs to public infrastructure including roads, bridges, culverts and public facilities. Local governments are expected to pay the remaining 5%. In many towns even 5% of the cost exceeds the entire annual budget for the town. However, in recognition of this potential burden, the state will cover the amount exceeding what a three cent property tax increase would raise. Nonetheless, the need for matching funds will remain an obstacle for some communities limiting their ability to repair buildings, parks, and lower priority facilities.

Alternative and enhanced projects have to be paid for by towns above replacement costs. These projects are likely to be proposed as towns choose to rebuild in different locations, combine or separate functions, or build larger facilities to meet current needs. This will expand the unmet needs shown above. Furthermore, FEMA denies some claims outright. These projects represent significant unmet needs of over \$6.4 million.

Town-Owned Facilities

Less well documented is the damage to town halls, libraries, police and fire stations, and other town-owned facilities. There was damage in numerous towns and the worst hit had virtually all their facilities damaged. The estimated number of damaged buildings is ten and the average repair or replacement cost is \$400,000 (\$4,000,000 total). The local share is projected to be \$500,000.

Some reasonable repair costs are likely to be rejected by FEMA, leaving the municipality to pay all of the costs. Town-owned buildings unmet needs are estimated at an additional \$500,000.

Non-profit and community service buildings

Vermont Community Fund made at least 29 grants to non-profit groups for storm related repairs and replacement of building contents. These facilities include senior centers, child day cares, youth recreation facilities, and social service agencies. These grants were small and were not intended to reconstruct buildings, but rather to get through the cleanup phase and meet immediate needs. Assuming half of these buildings need major repairs at an average cost of \$100,000 (it could be much higher), there is an unmet need for these 15 sites of \$1,500,000.

The total estimated unmet community infrastructure need is \$8,491,328.

Public Comment:

Citizen Participation (77FR22587 and 77FR222587)

Outreach and citizen participation efforts started within days of Tropical Storm Irene. In the days immediately following the storm, agency staff reached out to over 255 affected businesses and gathered valuable information to prepare an appropriate response for immediate assistance to the business community. The state also established a 211 call center to assist individuals with housing and other emergency needs. DEHCD led one of the states most comprehensive and effective efforts to understand the needs of communities most impacted by the disasters. Dubbed the Community Recovery Partnership, the team-oriented initiative engaged community members, state agencies, and local leaders in a collaborative effort to think about long-term planning and implementation of recovery efforts. Thirteen regional Community Recovery Partnership meetings, reaching 45 of the hardest hit communities, were held throughout the state. This effort helped to identify and shape both the short and long term recovery needs that will allow the state to emerge from this disaster safer, smarter, and stronger. It greatly informed the development of the Action Plan.

In an effort to better understand the comprehensive recovery needs and help prepare the Draft Action Plan, DEHCD also consulted with regional development and planning organizations, affordable housing developers and providers, disaster case-managers, Long Term Recovery Committees, FEMA, SBA, EDA, and other state agencies. In addition DEHCD solicited and/or partnered in a number of surveys to assess the needs of municipalities, farmers, businesses, and disaster victims.

The Draft Action Plan was distributed and made available on May 29, 2012 for public comments. The DEHCD solicited public comment for 30 days. Staff conducted three public hearings: June 5 in Brattleboro (Windham county); June 7 in White River Junction (Windsor county), and June 12 in Montpelier (Washington county) to present the draft Action Plan and seek input.

A total of 84 individuals attended the three public hearings and 29 written comments were received that have provided valuable feedback and input to help finalize the State's Action Plan. The comments have been summarized and responded to appropriately. See Appendix B - Public Comments and Responses written document http://accd.vermont.gov/strong_communities/opportunities/funding/cdbgdr

Staff have been providing one-on-one technical assistance on a daily basis to discuss projects, eligible activities, the application process. To expand capacity, a specific training session was held for our regional partners, regional planning commissions, regional development corporations, and consultants to provide them with thorough information regarding the CDBG-DR federal requirements, the State's Action Plan, Method of Distribution and application process to provide them with the opportunity to assist municipalities, for profits, non-profits, and developers to access the CDBG-DR funding for recovery projects as outlined in the Action Plan under the \$8M allocated to Economic Recovery, Housing Recovery, Infrastructure repairs and Planning Activities through a competitive process. Further, staff have been conducting application workshops in Williamsville September 13, 2012 with 75 attendees representing municipalities, businesses and nonprofits and September 20, 2012 in Waterbury with 35 attendees to provide as much direct technical assistance and exposure of the availability of the CDBG-DR funding as possible. More workshops will be conducted over the coming weeks, along with continued one-on-one meetings and project site visits.

National Objective	Target	Actual
Low/Mod	\$10,830,105.50	\$13,568,274.00

Overall Progress Narrative:

The activities that have transpired since the grant's conception include the following:

The staff participated in a Flood Recovery Workshop in December 2011 with peers from Iowa, Mississippi and Louisiana to learn about "Best Practices" when planning and implementing long-term disaster recovery, particularly when funded with CDBG-DR funds.

January 25, 2012, participated in conference call with HUD Headquarters and Field Office staff to discuss the upcoming funding, timelines, preparedness, drafting the Action Plan for the unmet needs, and the citizen participation, and public outreach component.

February 7, 2012, staff participated in an all day collaborative workshop facilitated by the National NeighborWorks of America with the HomeOwnership Centers to develop a plan for providing Housing Recovery strategies for rehabilitation and downpayment assistance potentially with buyouts.

February 13-16, 2012, staff attended the HUD-sponsored Disaster Training in Fort Worth, TX. The objective of the training was to increase the capacity of the staff to provide technical assistance and administrative support to grant applicants and to carry-out the responsibilities of the Grant from HUD appropriately.

The state received the Federal Register on April 16, 2012, and the team immediately coordinated their efforts in formulating a plan for the Disaster Recovery Allocation.

In order to expedite the process, the team augmented its capacity by acquiring the services of a disaster and community development consultant. The consultant assisted in identifying key elements in the state's approach in responding to the Federal Register Notice, as well as with the collection of and dissemination of data of unmet needs for the development of the draft Action Plan.

Weekly meetings commenced to ensure the timeliness of gathering data, meeting the deadlines and enlisting the public participation was met.

Simultaneously, staff commenced meeting weekly to draft a new CDBG-DR application to input into the online Intelligrants Management System to be available and ready for access upon HUD's approval of the State's Action Plan.

The team recognized the limitation set forth by the Federal Register with regards to the targeting requirements. The State worked closely with the Vermont delegation in order to expand flexibility of the 80% constraint to include Windham County. This flexibility allowed businesses and residents affected by the Disaster to benefit at a more

equitable level, and gave the State the opportunity to meet more of the severe unmet needs in Windham county that otherwise would have gone untouched.

To ensure a broad communications outreach, numerous public hearings were held in several locations, conducted stakeholder meetings, and attended town hall meetings all across the state to solicit inputs and ideas with regard to the relief aid. Formal Public Hearings: June 5, 2012 – Brattleboro; June 7, 2012 – White River Junction; and June 12, 2012 – Montpelier.

The team also worked closely with businesses regarding unmet needs. The team coordinated efforts with them to solicit input and feedback that could be aggregated, and incorporated as a major element in the Action Plan.

The team reached out to small, organic farming businesses that had been impacted by the disasters. In some cases, these were businesses that had limited resources and the ability to fully understand and access the opportunities provided by this disaster relief.

All of the inputs from the community (residents, businesses, farming communities, etc.) were carefully considered and incorporated into the Action Plan, and was submitted to and approved by HUD on August 30 2012.

Upon submission of the Action Plan, the staff conducted outreach and training sessions to potential grantees and stakeholders, and most importantly, worked with the Regional Development Organizations to expand the State’s capacity to reach the underserved populations. The objective was to educate them on the details of the Regulations of the Federal Register, as well as reiterate the constraints and limitation of the disaster funding.

The training also included technical training on the Intelligrants Management system, the State’s grant-application system that helps track, monitor, and provide a communications medium for the state and its grantees. Grants Management Director worked closely with the General Counsel drafting Grant Agreements for the State Direct Projects for the Buy-outs that will assist in match with Hazard Mitigation Grant Program (HMGP) funding, as well as in some cases assisting in buyouts of FEMA ineligible properties that are in harm’s way but are not on a mapped floodway, and the Housing Recovery Program for downpayment assistance and rehabilitation for homeowners. In addition, we drafted model documents for subrogation and assignment agreements, duplication of benefits, subgrant agreements, and Deed Restrictions.

Collaborated with the Vermont Housing and Conservation Board (VHCB) to identify specific properties that upon buy-out would have a VHCB conservation easement placed upon it and in exchange, VHCB would contribute funds towards match of the buy-outs.

Staff worked closely with many communities and individuals to identify eligible projects to apply for the available competitive funds. There were two rounds held during this period November 7, 2012 and December 12, 2012. Awards were made in November to: Brattleboro Housing Authority for \$100,000 for a planning grant; the Town of Johnson for \$460,000 for an implementation grant; the Town of Waterbury for \$100,000 for a planning grant; and the Central Vermont Community Action Council (CVCAC) for \$1,000,000 for an implementation grant. Awards were made in December to: Brattleboro Development Credit Corporation (BDCC) for \$1,000,000 for an implementation grant; to the Town of Waterbury for \$30,000 for a planning grant; and to the Village of Waterbury for \$115,000 for an implementation grant.

CD Director and GM Director worked closely with the Business Assistance Programs awarded to CVCAC and BDCC to get them up and running, providing technical assistance on the development of their forms and processes, eligibility factors, duplication of benefit issues and floodplain issues, 8-step process, floodplain insurance requirements, Davis-Bacon requirements, and financial management requirements.

As this quarter ends, we are looking forward to the realization of full implementation of projects, seeing buy-outs occur, grants being provided to businesses, rehabilitation activities being undertaken on damaged homes as we move into spring and the construction season.

Project Summary

Project #, Project Title	This Report Period	To Date

Match Contributed	\$0.00	\$0.00

Activity Description:

Funds will be used to provide the 25% match for the Hazard Mitigation Grant Program total project costs of these commercial properties to buy them out to clear the land to remain forever green space.

Two Rivers Ottauquechee Regional Commission (TRORC) will serve as the lead organization to administer the delivery of this program, working through several of the other Regional Planning Commissions to assist in the necessary field work and providing technical assistance to municipalities specific to their respective regions, and to assist in the actual closings with the business owners, municipalities and the Hazard Mitigation Grant Program (HMGP). The State will be working closely with TRORC to provide draft documents, subgrant agreements, duplication of benefit documentation and ongoing technical assistance and oversight monitoring of the program.

Location Description:

Properties identified at this point are located predominantly in Windsor county (one of the 80% targeted counties) with a few properties located in Washington county.

Activity Progress Narrative:

See comments under "Residential Buyout - Washington/Windsor Counties".
No activity report under commercial buyouts.

Activity Description:

Vermont's downtown and village centers are central to its identity, economy and social framework. The natural disasters of 2011, particularly Tropical Storm Irene brought significant damage to some and nearly destroyed others. Specialized assistance is required to help these areas rebuild and recover in ways that ensure long term economic viability and strength. DEHCD proposes funding state-directed effort to bring the required assistance to these communities, nearly all of which are struggling, with little staff and resources, to manage the demands of disaster recovery. The Downtown Program will assemble a resource team to assist impacted downtowns or village centers. Activities will include market analysis to determine appropriate marketing and redevelopment approaches, in other words what type of economic restructuring the market will support. This analysis will help communities determine their new identities, branding, marketing, and implementation strategies.

Match Contributed	\$0.00	\$0.00

Activity Description:

To provide grants or loans for repairs, working capital, rental subsidies, land restoration for all businesses, and nonprofits, including farms.

Location Description:

Businesses located in the non-targeted counties, all counties received a Presidentially declared disaster, it would be those counties outside of Washington, Windsor and Windham counties.

Activity Progress Narrative:

A loan \$500,000 in CDBG-DR funds was provided to Johnson Market, LLC to be used to >purchase equipment and fixtures as part of an overall restoration of bringing back a grocery >store to the Town of Johnson and surrounding communities that saw the former Grand >Union Supermarket located at 131 Lower Main West close due to the spring snowmelt and >excessive rain that led to the flooding (DR#4009 & DR#4022) of the grocery store and subsequent closing of the former 13,000 square foot store that served the greater Johnson area until May 2011. The Town of Johnson is a community of 3,446 residents without a grocery store. The loss of the >grocery store has deeply impacted not only Johnson but also Belvidere, Eden, Waterville, >Cambridge and North Hyde Park, and the replacement of the store has become a top >community and economic development priority as the closest full line grocery stores are >located in Morrisville (8 miles east of Johnson). For Johnson residents who do not own a >car, the only option to shop for groceries is in small convenient stores which provide a >limited selection of groceries at unaffordable prices. The Town of Johnson is working with >Mike Comeau who brings his experience of owning two successful grocery stores to this >operation, the Richmond Market and Beverage and the Village Market of Waterbury.

Johnson Market, LLC is leasing from Pomerleau Realty. The owner will commence flood mitigation measures in early spring prior to Mike Comeau (renter) retrofitting the interior space, and installing the equipment.

Activity Description:

To provide grants or loans for repairs, working capital, rental subsidies, land restoration for businesses, and nonprofits, including farms located in Windham county.

Location Description:

Businesses located in Windham county

Activity Progress Narrative:

Brattleboro Development Credit Corporation (BDCC) and Springfield Regional Development Corporation (SRDC) have been granted \$1 million in CDBG-DR funding to assist qualifying businesses throughout their 37-town service areas impacted by Tropical Storm Irene. BDCC/SRDC will sub-grant, and where feasible, loan, CDBG-DR funds to qualifying businesses. If deemed eligible, business applications are reviewed by a 5-member Selection Committee. Technical assistance will be provided to the businesses by BDCC’s Disaster Recovery staff and Small Business Development advisors. Funding will be prioritized to support Low and Moderate Income qualifying businesses. BDCC/SRDC anticipated assisting 24 businesses with the majority receiving grants ranging from \$20,000 to \$40,000. BDCC is the lead administrator of the program, with SRDC providing technical assistance and direct support for the business applying from Southern Windsor County. All parties will also be responsible for monitoring the use of the funds and evaluating the effectiveness of the program. During this reporting period, staff provided thorough technical assistance to develop documents, including application forms, subrogation agreement, duplication of benefits, etc. BDCC promoted the program through various media outlets, conducted several outreach sessions with specific businesses to ensure broad communication of the program, discuss eligibility criteria, and to assist businesses to complete the application for the funds.

Activity Description:

To provide grants or loans for repairs, working capital, rental subsidies, land restoration for all businesses, and nonprofits, including farms.

Location Description:

Businesses located in Washington and Windsor counties

Activity Progress Narrative:

Central Vermont Community Action Council (CVCAC), in collaboration with the Central Vermont Economic Development Corporation (CVEDC) and the Green Mountain Economic Development Corporation (GMEDC), shall use CDBG-DR funds to provide business assistance in the form of grants, and loans where appropriate, to meet businesses' unmet needs related to the three 2011 disaster events. The primary focus (80%) of the Business Assistance Program will be for businesses located in Washington and Windsor counties with the remainder located in other hard-hit areas of other Vermont counties. CVCAC will administer the program and the Consultants will provide technical assistance to help businesses apply for the financial assistance. They will collaboratively review funding applications and make decisions based upon the Program's priorities and will disburse the funds. They will jointly monitor the use of the funds and evaluate the effectiveness of the program.

During this reporting period, staff provided thorough technical assistance to develop documents, including application forms, subrogation agreement, duplication of benefits, etc. CVCAC promoted the program through various media outlets, conducted several one-on-one outreach sessions with specific businesses to ensure broad communication of the program, discuss eligibility criteria, and to assist businesses to complete the application for the funds.

Total Funds Expended	\$0.00	\$0.00
Gilman Housing Trust, Inc.	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

The funding will be used for the repair and rehabilitation of damaged owner occupied homes and rental units, including site work, driveways, wells, septic systems, debris removal, financial counseling, downpayment assistance and other housing needs as they evolve. The funding will be in the form of grants or loans if the debt to equity ratio is less than 40%, and may, on a case-by-case basis be a grant even with the less than 40% debt to equity ratio. The Homeownership Centers (HOC's) have projected to serve approximately 18 households for an average of \$35,000 per household. There will be affordability requirements placed on the rental units that at least 51% of the units will serve individuals at 80% and below of area median income for a period not to exceed 5 years. In addition, there will be a requirement for each property that is renovated that is in a flood plain to secure and maintain flood insurance with a deed restriction that flood insurance is required permanently.

Location Description:

Activity will take place in the counties outside of Washington, Windsor and Windham. All counties had received a Presidential declaration, although Rutland and Orange counties have the majority of the damage of the non-targeted counties there are homes in several of the other counties that we anticipate will be served.

Activity Progress Narrative:

No activity to report at this time.

Activity Description:

The funding will be used for the repair and rehabilitation of rental units, including site work, driveways, wells, septic systems, debris removal, financial counseling, downpayment assistance and other housing needs as they evolve. The funding will be in the form of grants or loans if the debt to equity ratio is less than 40%, and may, on a case-by-case basis be a grant even with the less than 40% debt to equity ratio. There will be affordability requirements placed on the rental units that at least 51% of the units will serve individuals at 80% and below of area median income for a period not to exceed 5 years. In addition, there will be a requirement for each property that is renovated that is in a flood plain to secure and maintain flood insurance with a deed restriction that flood insurance is required permanently

Gilman Housing Trust, Inc.	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

The funding will be used for the repair and rehabilitation of damaged owner occupied homes and rental units, including site work, driveways, wells, septic systems, debris removal, financial counseling, downpayment assistance and other housing needs as they evolve. The funding will be in the form of grants or loans if the debt to equity ratio is less than 40%, and may, on a case-by-case basis be a grant even with the less than 40% debt to equity ratio. The HomeOwnership Centers (HOCs) have projected to serve approximately 45 households for an average of \$35,000 per household. There will be affordability requirements placed on the rental units that at least 51% of the units will serve individuals at 80% and below of area median income for a period not to exceed 5 years. In addition, there will be a requirement for each property that is renovated that is in a flood plain to secure and maintain flood insurance with a deed restriction that flood insurance is required permanently.

Location Description:

Housing recovery activities will be conducted in the targeted counties of Washington and Windsor.

Activity Progress Narrative:

Gillman Housing Trust (GHT), in collaboration with the state's five NeighborWorks Home Ownership Centers (HOC's), shall use CDBG-DR funds for repair and rehabilitation of damaged homes and rental units damaged during the spring and summer flooding (DR#1995; DR#4001; DR#4022). The repair and rehabilitation also include site work, driveways, wells, septic systems, debris removal, financial counseling, down payment assistance and other housing needs as they evolve. In consultation with the Long Term Recovery Committees and with the state's disaster case managers, the HOCs shall provide funding in the form of grants or loans if the debt to equity ratio is less than 40%. The HOCs may provide grants where there is less than 40% debt to equity ratio on a case-by-case basis. It is projected that the CDBG-DR funds will serve

approximately 75 households for an average of \$35,000 per household.

There will be affordability requirements placed on the rental units that at least 51% of the units will serve individuals at 80% and below of area median income for a period not to exceed 5 years. In addition, there will be a requirement for each rehabilitated property that is in a flood plain to secure and maintain flood insurance with a deed restriction that flood insurance is required permanently.

The HomeOwnership Centers (HOCs) have projected to serve approximately 12 households for an average of \$35,000 per household. There will be affordability requirements placed on the rental units that at least 51% of the units will serve individuals at 80% and below of area median income for a period not to exceed 5 years. In addition, there will be a requirement for each property that is renovated that is in a flood plain to secure and maintain flood insurance with a deed restriction that flood insurance is required permanently.

Location Description:

Working within the mandate of expending 80% of the allocation in Washington, Windsor and overall up to \$4.5M in Windham counties and the balance of 20% in the rest of the counties. The targeted funds will be spent in Windham county. We will be monitoring closely the amount spent in Windham county to ensure across all programs that we do not exceed the \$4.5M permitted for Windham county.

Activity Description:

CDBG-DR funding for this activity will help replace affordable housing lost to natural disaster in 2011 and seed a program that addresses a long-standing need for affordable and flexible financing for mobile homes. It will also assist owners of mobile home parks that have suffered damages and lost revenue by facilitating the purchase of new homes. Under the Mobile Home Financing Program, low interest to 0% interest loans will be provided to assist in the acquisition of replacement mobile homes. Further, the statewide network of HomeOwnership Centers (HOCs) will provide homebuyer education to participants and assistance with rehabilitation of the purchased homes, when necessary.

Hunger Mountain Children's Center	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

The Hunger Mountain Children's Center had occupied the 123 S. Main Street building previously since 1978; however, due to the flooding had to relocate to the Hunger Mountain Christian Assembly Church on Route 100 seven miles outside Waterbury village in temporary space. This project is to acquire both buildings from the State and combine them to expand the Center's capacity to serve more children as a state-licensed operation for child care and preschool facility. The undertaking will require substantial rehabilitation to meet the licensing requirements, provide energy improvements and flood mitigation measures. One of the major renovations elements will be converting the garage into an open-sided, covered pavilion. All electrical panels will be removed from the basement levels.

Location Description:

121 and 123 S. Main Street; Waterbury, Vermont 05676, these are two historic structures that are part of the total Waterbury State Office Complex that was flooded during Tropical Storm Irene in August 2011.

Activity Progress Narrative:

Match Contributed	\$0.00	\$0.00

Activity Description:

Conduct feasibility studies, design work required to carry out disaster recovery projects, marketing studies and campaigns.

Location Description:

Municipalities located in Washington and Windsor counties

Activity Progress Narrative:

Waterbury shall use \$100,000 in CDBG-DR Funds to undertake the feasibility of developing a Municipal Civic Complex that would house the municipal offices, the police station, and the Library and historic preservation collection, and much needed community meeting space. The town/village lost its municipal building, including police headquarters to Tropical Storm Irene flooding in August 2011 and has been operating out of temporary spaces since that time.

The difficulty the community faces is the limitation of the space available to develop the Complex that is not in a Floodplain and therefore requiring extraordinary measures to meet the HUD "Critical Actions" when placing a police station in a floodplain location.

Phase I of the study will be to review the Stanley and Wasson buildings at the State Office Complex which have been identified as potential sites for the new facility. Complete the 8-step Floodplain review process as part of the HUD environmental review to determine if no other feasible options exist, this includes the public participation process to vet these sites and options of design. Phase II of the study will include the development of the building and site plan schematics, preliminary budget preparation, cost estimates, preliminary permit review and preparation for the pre-development work for implementation to build a municipal complex.

Moving to implementation will require voter approval and bonding to meet the costs associated with building and meeting the floodplain requirements for "Critical Actions" of elevating to the 500 year floodplain levels.

The community asked the regional environmental officer to meet with them to discuss the 8-Step Flood Plain Process and other

environmental issues. An RFP was issued for architectural work to develop the preliminary plans for the municipal complex. The goal is to establish conceptual plans and costs by town meeting day (March 5th).

Location Description:

Municipalities located in Windham county

Activity Progress Narrative:

The Brattleboro Housing Authority (BHA) shall use \$100,000 in CDBG-DR Funds to undertake the planning activities in response to repeated flooding, evacuations and damages caused by Tropical Storm Irene. The project will prepare for the development of housing to replace units for the elderly and disabled at Melrose Terrace. BHA will also examine the structural, environmental and regulatory issues which will impact the potential re-use of the Melrose Terrace property and develop a plan to preserve or create housing units that are not in the Special Flood Hazard Area (SFHA). BHA will also determine the impact and potential uses of HUD Public Housing regulatory and financing mechanisms to ensure BHA is able to move forward without substantial detriment to its Public Housing budget and all other facets of its financial and programmatic operations. One of the major activities during this period was the undertaking the procurement process for: development partner, HUD PHA financing and regulatory specialist, HUD PHA re-development Legal Counsel; Architect & Engineering Firm or Partnership; and Financing/tax credit specialist.

Town of Waterbury	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

Several of Waterbury's Long-term Community Recovery projects focused on strategies to aid economic recovery and improve the vitality of the downtown by diversifying potential revenue streams. Recreational opportunities assist in maintaining an economically and culturally vibrant downtown, and with the loss of over 2000 State workers on a daily basis and the loss of several other businesses, this Planning study for a trail connector into the Village/Town of Waterbury to connect the recreation trail ultimately from the Stowe area and the Little River Park is critical to bring commerce into the community via another route. Biking trails has proven to be a catalyst for thriving local economies in numerous other parts of the country, especially by connecting the downtown and one of the primary gateways to recreational resources - visitors.

Two Rivers Ottauquechee Regional Commission	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

The State will use CDBG-DR funds to provide the 25% match where needed and eligible for the Hazard Mitigation Grant Program (HMGP). By making this commitment, the state will maximize participation in the HMGP buyouts to give homeowners a better chance at recovery while removing properties from flood-prone areas and supporting municipalities.

Other properties have been identified as being appropriate for buyouts but, for various reasons, have not been determined to be FEMA-eligible; however, will be considered for 100% buyout with CDBG-DR funds. In addition, a portion of these funds will support land restoration once the demo and clearance of the parcels has been done to provide finished green space and/or limited recreational facilities, staying within the deed restrictions of no permanent structures.

Two Rivers Ottauquechee Regional Commission (TRORC) will serve as the lead organization to administer the delivery of this program, working through several of the other Regional Planning Commissions to assist in the necessary field work and providing technical assistance to municipalities specific to their respective regions, and to assist in the actual closings with the homeowners, municipalities and the Hazard Mitigation Grant Program (HMGP). The State will be working closely with TRORC to provide draft documents, subgrant agreements, duplication of benefit documentation and ongoing technical assistance and oversight monitoring of the program.

Activity Description:

The funds will be used for the 25% match to the Hazard Mitigation Grant Program for the total project costs to buy out the properties to clear the land to remain forever green space. Other properties have been identified as being appropriate for buyouts but, for various reasons, have not been determined to be FEMA-eligible; however, will be considered for 100% buyout with CDBG-DR funds. In addition, a portion of these funds will support land restoration once the demo and clearance of the parcels has been done to provide finished green space and/or limited recreational facilities, staying within the deed restrictions of no permanent structures.

Location Description:

The residential buyouts will take place in Washington and Windsor.

Activity Progress Narrative:

The project is still in the pre-closing delivery phase. No buyouts have occurred yet. Extensive work has been done coordinating with ACCD, SAIC, DEMHS, VHCB and case managers to ensure all potential buyout applicants are being served. Post-application follow-ups have been done with many towns and owners and CDBG-DR forms have been obtained from most owners. TRORC has hired one staff person, an attorney and SWCRPC to assist on the project. We do a weekly update of sites, and have begun coordination with ACCD on sites that are non-HMGP. For HMGP sites, work has been done preparing and issuing contracts to all towns with approved projects and documenting procurement. Total involved properties number approximately 134 to date. Approximately one third are still awaiting FEMA approval and two thirds are in progress for buyouts. Assistance to owners on DOB documentation and understanding the overall process is ongoing.

Grantee Activity Number: Res buyouts Windham Urgent Need

Activity Title: Res buyouts Windham Urgent Need

Activity Category:

Acquisition - buyout of residential properties

Project Number:

Property Buy Outs

Projected Start Date:

07/01/2012

Benefit Type:

Direct Benefit (Households)

National Objective:

Urgent Need

Activity Status:

Under Way

Project Title:

State Direct Property Buy Outs

Projected End Date:

09/30/2017

Completed Activity Actual End Date:

Responsible Organization:

Two Rivers Ottawaquechee Regional Commission

Overall

	Oct 1 thru Dec 31, 2012	To Date
Total Projected Budget from All Sources	N/A	\$106,000.00
Total Budget	\$106,000.00	\$106,000.00
Total Obligated	\$0.00	\$0.00
Total Funds Drawdown	\$0.00	\$0.00
Program Funds Drawdown	\$0.00	\$0.00
Program Income Drawdown	\$0.00	\$0.00
Program Income Received	\$0.00	\$0.00
Total Funds Expended	\$0.00	\$0.00
Two Rivers Ottawaquechee Regional Commission	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

The funds will be used for the 25% match to the Hazard Mitigation Grant Program for the total project costs to buy out the properties to clear the land to remain forever green space. Other properties have been identified as being appropriate for buyouts but, for various reasons, have not been determined to be FEMA-eligible; however, will be considered for 100% buyout with CDBG-DR funds. In addition, a portion of these funds will support land restoration once the demo and clearance of the parcels has been done to provide finished green space and/or limited recreational facilities, staying within the deed restrictions of no permanent structures.

Location Description:

Municipalities located in Windham county

Activity Progress Narrative:

See comments under "Residential Buyout - Washington/Windsor Counties".

Two Rivers Ottaquechee Regional Commission	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

the State will use CDBG-DR funds to provide the 25% match where needed and eligible to the Hazard Mitigation Grant Program (HMGP) for the buyout of residential properties. By making this commitment, the state will maximize participation in the HMGP buyouts to give homeowners a better chance at recovery while removing properties from flood-prone areas and supporting municipalities. Other properties have been identified as being appropriate for buyouts but, for various reasons, have not been determined to be FEMA-eligible; however, will be considered for 100% buyout with CDBG-DR funds. In addition, a portion of these funds will support land restoration once the demo and clearance of the parcels has been done to provide finished green space and/or limited recreational facilities, staying within the deed restrictions of no permanent structures. Two Rivers Ottaquechee Regional Commission (TRORC) will serve as the lead organization to administer the delivery of this program, working through several of the other Regional Planning Commissions to assist in the necessary field work and providing technical assistance to municipalities specific to their respective regions, and to assist in the actual closings with the business owners, municipalities and the Hazard Mitigation Grant Program (HMGP). The State will be working closely with TRORC to provide draft documents, subgrant agreements, duplication of benefit documentation and ongoing technical assistance and oversight monitoring of the program.

State of Vermont Agency of Commerce & Community	\$3,743.07	\$3,743.07
Match Contributed	\$0.00	\$0.00

Activity Description:

State administration activities will include, but not be limited to the general administration of the CDBG-DR Program providing technical assistance to applicants, grantees, nonprofits/for profits, municipal officials and other state agencies; reviewing and scoring applications; developing grant agreements and other pertinent legal documents; conducting oversight monitoring of grantees and projects; writing quarterly reports; completing review of drawdown requests, drawing funds from the Letter of Credit; and closing out projects.

Location Description:

State of Vermont Agency of Commerce and Community Development; Department of Economic, Housing and Community Development Offices at One National Life Drive; Montpelier, VT 05620-0501 - predominant location; however, in monitoring, providing technical assistance will be throughout the State.

Activity Progress Narrative:

The State made a conscious decision to distribute the allowable 5% State Administration allocation between the targeted (80%) and non-targeted (20%) funding. The objective was to provide a more equitable distribution for the grantees. See comments for activity narrative under the overall narrative.

Activity Description:

The activity will be a comprehensive marketing campaign for the Route 100 corridor down through Washington and Windsor counties aimed at restoring tourism, and the vital economic activity it generates, during the state's fall foliage season. Route 100 spans to the southernmost point in Vermont and stretches through the central part of the state and ends in Vermont's Northeast Kingdom. Route 100 is the major north-south travel corridor that has tremendous direct impact on Vermont's tourism economy and supports multiple communities.

This activity will not take place until businesses along the Route 100 corridor in Washington and Windsor counties have received economic recovery assistance through the CDBG-DR funding.
